TECHNICAL & REGULATORY CONSULTING

Company

SAFE BIOCARE's objective is to ease global exchanges between exporting SMEs by advising them on the compliance with EU, USA and other legislations related to health, safety and environmental issues.

Our staff provides comprehensive technical support to the cosmetic industry.

SAFE BIOCARE is also conducting an ambitious R&D project designed to rapidly evaluate the efficacy of preservative systems. This project, sponsored by the Walloon Region of Belgium, is carried out in partnership with the University of Louvain (Louvain-la-Neuve, Belgium).

Services

- **Technical & regulatory consulting:**
 - Cosmetics & Toiletries
 - Food / Dietary Supplements
- **Safety assessment and claim substantiation** of cosmetics (raw materials and finished products).
- **Cosmetics GMP auditing:** ISO 22716.
- **Quality Control:** physicochemical and microbiological analysis.
- **Regulatory compliance:** submission of official documents to local competent authorities (EU, USA/FDA, Japan, Canada, ASEAN, Middle East...).
- **Training and organization of seminars.**
- **Research:** development of new methods of preservative system testing.

Worldwide:

EU, USA, Canada, Japan, ASEAN, Middle East...
